

## User Login Screen

A mobile app login screen mockup. At the top, the status bar shows '07:48 PM', signal strength, Wi-Fi, and battery. Below the status bar is a 'Welcome Back!' message in a white box. Underneath is a white box with the text 'Please enter your username and password'. The form consists of two fields: 'Username:' with the value 'anonymous123' and 'Password:' with masked characters '.....'. Below the password field is a red error label with a circular icon of dots. At the bottom of the form are a 'Login' button and a 'Sign-up' link.

## Phone Entry Screen

A mobile app screen titled "Phone Entry Screen". At the top, the status bar shows "07:48 PM", signal strength, Wi-Fi, and battery icons. The main content area has a white background. It starts with a "Welcome !" message in a black box. Below it is a text input field with the placeholder "Please enter a valid phone number to proceed". Underneath the input field is a red "Error label". The phone number input is a dark grey field with a white "+1" dropdown on the left and the number "(123) 456-7890" in white. Below the number field is a loading spinner (a circle of dots). At the bottom is a "Submit" button in a black box.

07:48 PM

Welcome !

Please enter a valid phone number to proceed

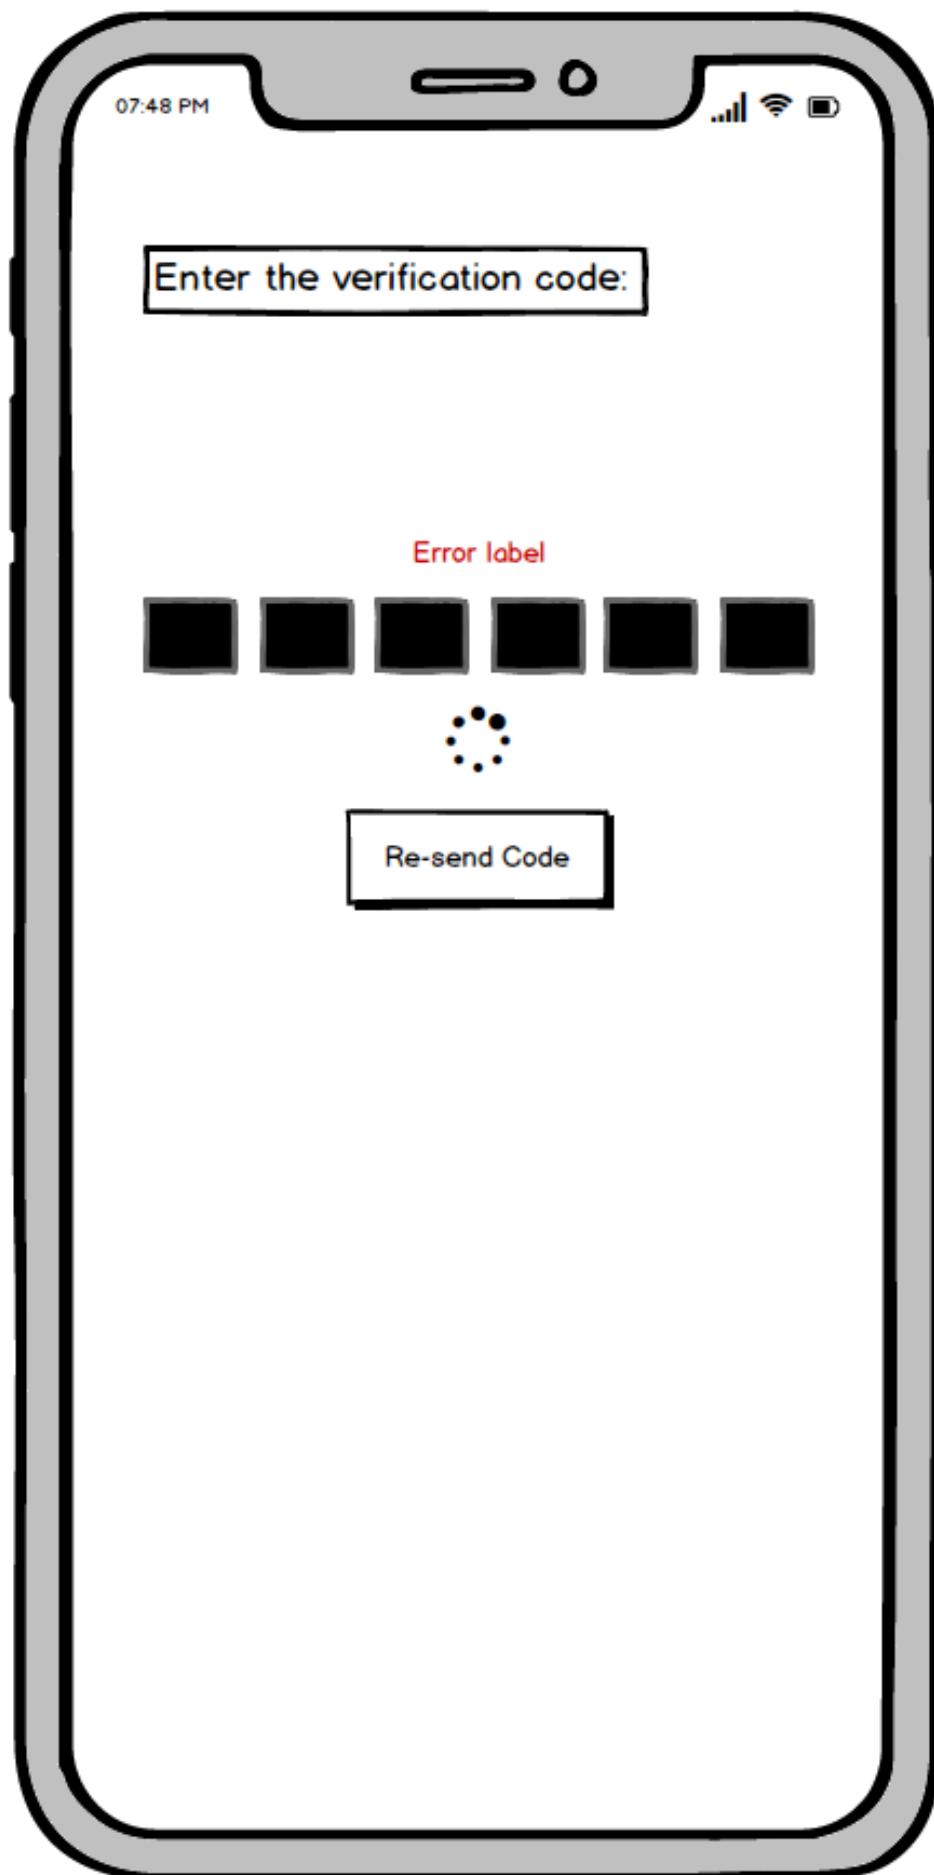

Error label

+1 ▼ (123) 456-7890

Submit

After choosing to sign-up, user must enter a valid phone number.

## Verification Code Screen

After submitting a valid phone number, the user will receive a six digit verification code. Upon correct entry of the code the user will be taken to the next screen automatically. The user can press Re-send to get a new code.

## Profile Setup Screen

07:48 PM

Create your profile

Set a profile picture:

Error label

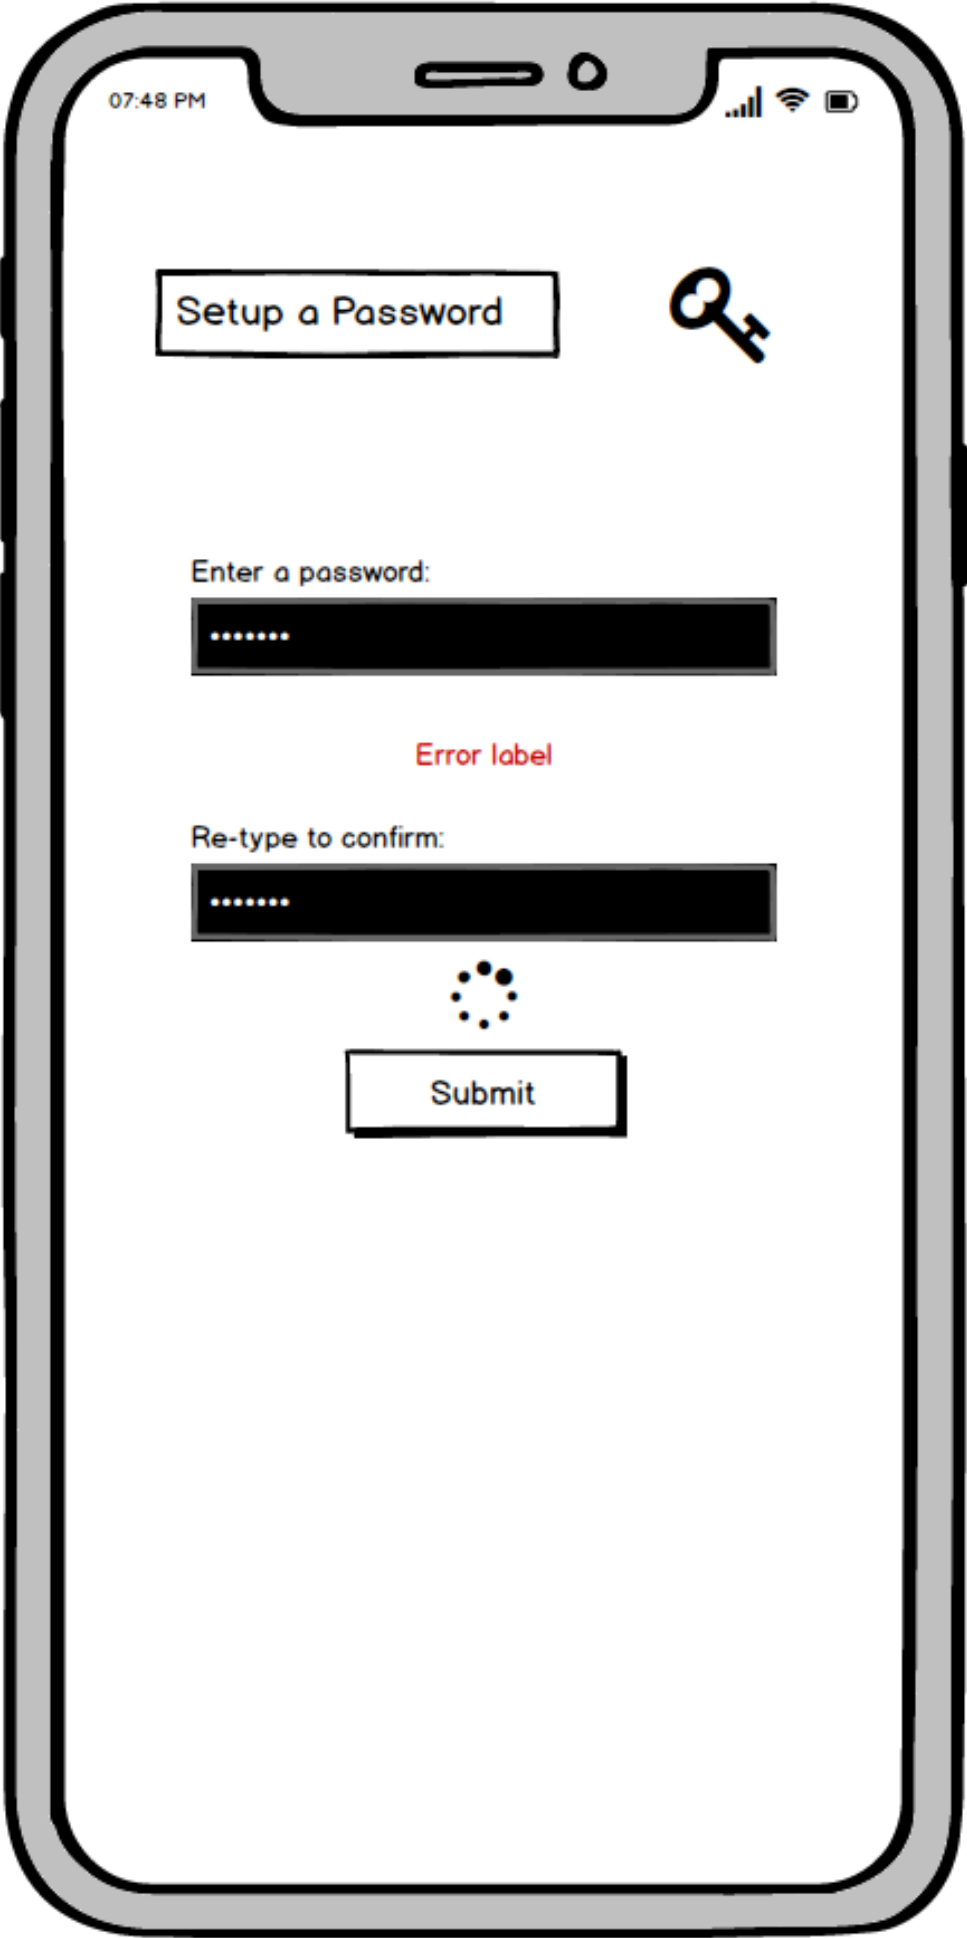

Enter a custom username:

anonymous123

Let's Go!

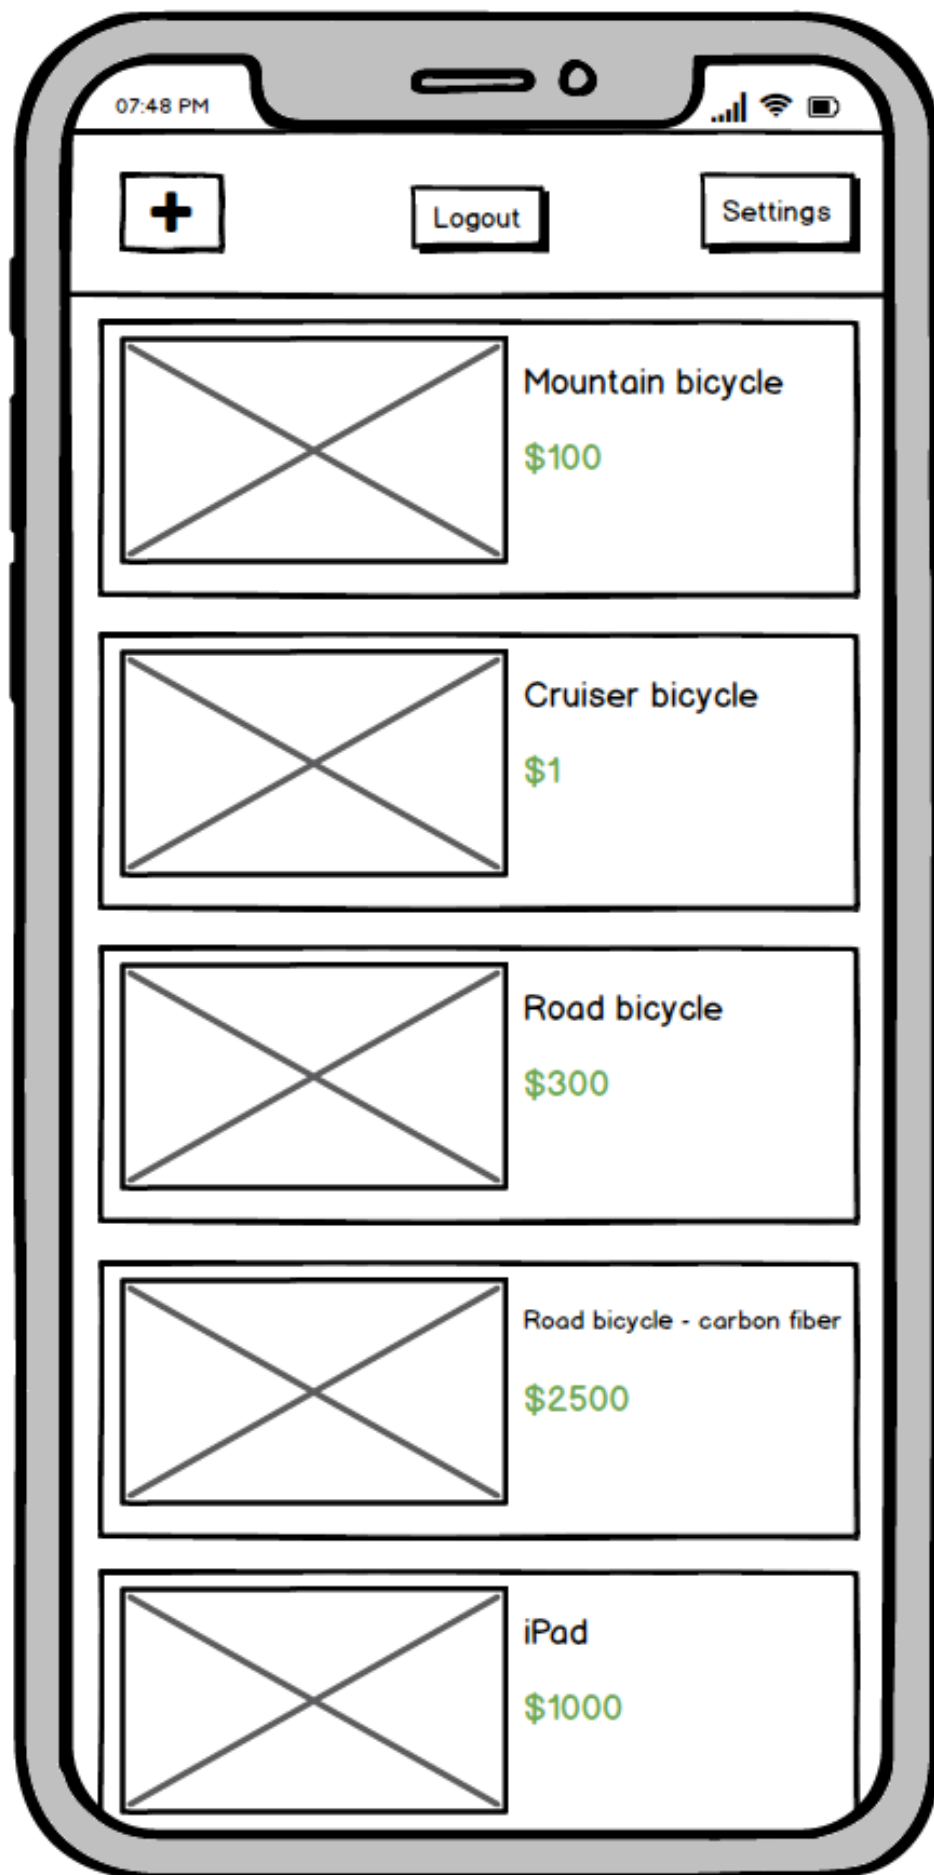

User must set a username and optionally upload a picture.

Password Creation Screen

The user must create a password

## Browse Screen

This is the "home" screen. The user can press the + button to create a new listing, the Logout button to return to the login screen, and press Settings button to go to settings. The user can scroll through the listings and tap on a listing to view the listing. Note: This screen should not have a navigation header

## New Listing Screen

07:48 PM

### Create a listing

Name of listing:

Old bicycle for sale

Item description:

It's missing tires and has a rusty chain

Price:

\$0.00

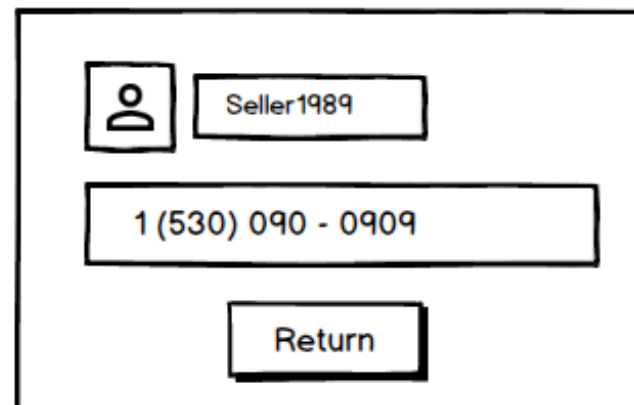

Upload an image:

Error label

Submit

The user can set the name of the listing. The user can enter a detailed description of the item for sale. The user can set a price for the item and upload a photo of the item. Upon successful submission of listing, user is returned to the browse screen.

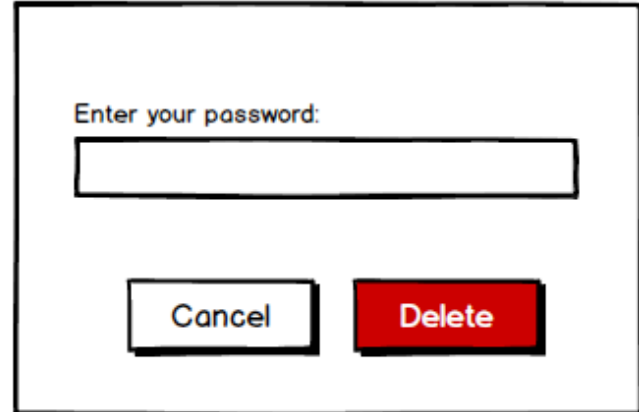

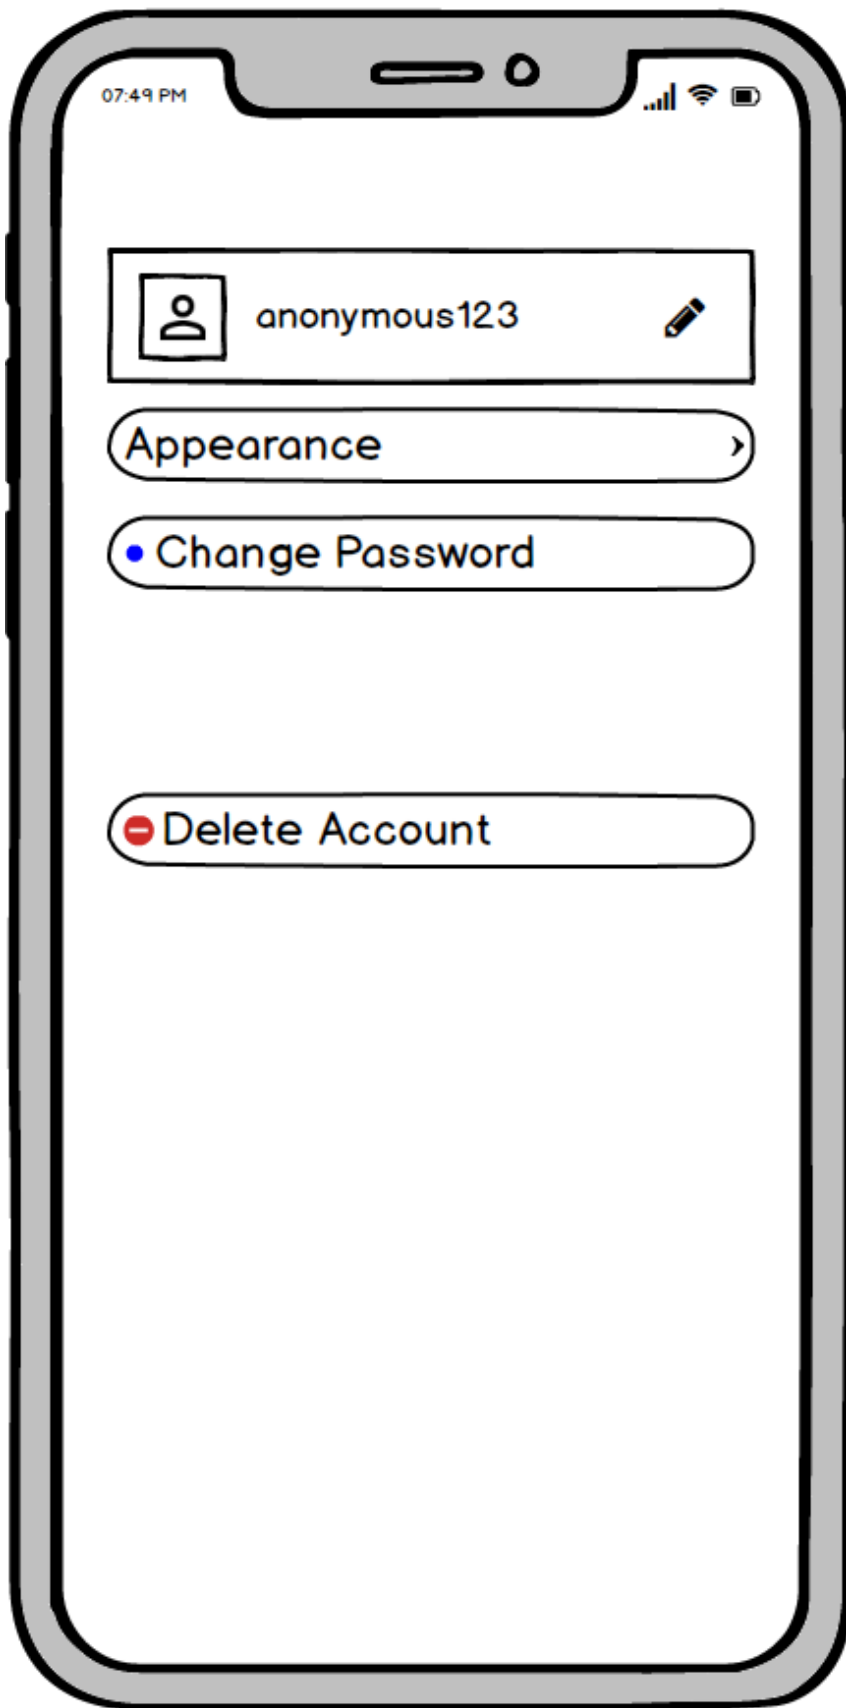

## View Listing Screen

The user can see the photo of the listing in larger format. The user can read the description for more information about the item. The contact button will display the seller's phone number, username, and profile picture. Return can be pressed to return to the listing.

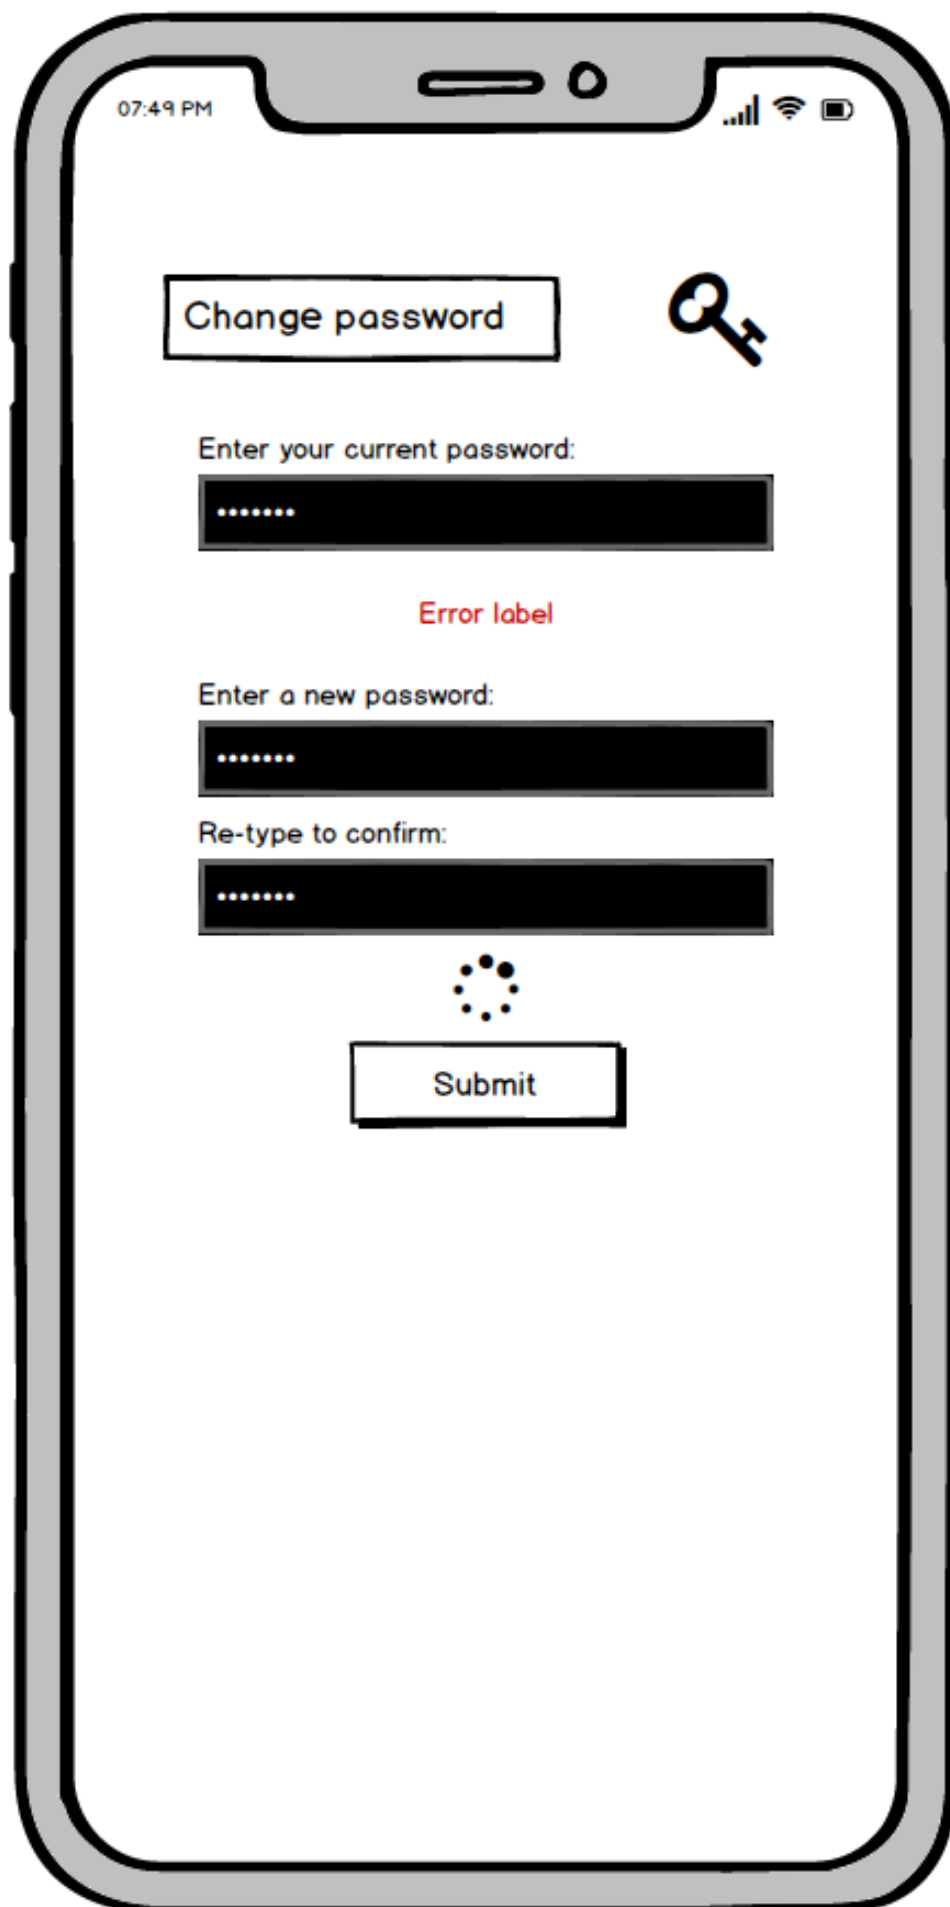

## Settings Screen

In the settings screen, the user can press the pencil to change his username. Tapping on the profile picture icon allows the user to change the profile picture. Appearance has no function for now. Tapping on change password will take the user to the change password screen. Delete account will present the user with a popup that will ask for password before deletion. Upon deletion, user will be returned to login screen.

## Change Password Screen

The image shows a mobile application screen for changing a password. At the top, the status bar displays the time as 07:49 PM, along with signal and battery icons. The main content area has a title 'Change password' in a box, accompanied by a key icon. Below this, there are three input fields: 'Enter your current password:', 'Enter a new password:', and 'Re-type to confirm:'. Each input field is represented by a black rectangle with six white dots. A red 'Error label' is positioned below the first input field. At the bottom, there is a loading spinner icon (a circle of dots) and a 'Submit' button.
